

Spelsberg offers upgrade to classic Abox design

The Abox junction box from Spelsberg is a true design classic. It may not be held in such high regard as the Jaguar E-Type or the original iMac, but its chic aesthetics and incomparable performance has made it one of the most popular junction boxes in the UK. In celebration of its continued popularity through the years, Spelsberg has extended the range so a greater number of electrical engineers and installer than ever before can benefit.

The range extension applied to the Abox 025 and Abox 040 models. The new, Abox m 025 and Abox m 040 are provided with metric knock-outs which allow installers to use cable glands to secure the entry points. In addition a new base design has been introduced for easier positioning during installation and one sidewall of the Abox m 040 features three knock-outs rather than the standard two.

Chris Lloyd, Spelsberg UK Managing Director, comments: "The Abox is one of the staples of the Spelsberg range and is synonymous with easy installation and reliable performance. The range extension recognises the ever changing requirements of electrical installations and is intended to offer flexibility to our customers to help them make secure connections for all of their applications."

The Abox range is available in a selection of sizes with halogen-free, polystyrene, polycarbonate construction providing protection against knocks. The enclosures are supplied with internal and external fixing points and optional mounting for terminals, models are also supplied with an injected, double-membrane seal which provides IP66 protection against water ingress.

For further information on the entire Spelsberg range download a catalogue at www.spelsberg.co.uk or contact a member of the expert sales team on 01952 605849.

“Space for you”

Spelsberg's company philosophy is based around the idea of providing flexibility and freedom to its customers. The space provided within each junction box; the large distribution and warehousing space; and the freedom to customise almost any product, irrespective of quantity, all equates to “Space for you”.

About Spelsberg

Spelsberg is one of the largest manufacturers of electrical enclosures in the world. With over 4,000 enclosures available as standard and further customisation possible, it offers solutions for almost any application.

With the largest supply of non-metallic enclosures, ex-stock in the UK, its products are often available for delivery within 24 hours; customisation is possible on any product, including bespoke entries, engraved corporate logos or fitted terminals, within 48 hours. Products can be ordered direct from Spelsberg or from most leading supply specialists including RS, Rapid, Farnell and CPC.
