

WAGO uses Spelsberg enclosures for new pre-mounted products available from Screwfix

As one of the most trusted names for interconnection technology it's little wonder that many of WAGO's products are available from Screwfix and other leading distributors. Its terminals and conductors can now be bought pre-mounted in a Spelsberg A-Box enclosure. The Spelsberg range was chosen for its quality and the flexibility of the available dimensions.

If you're a professional electrician, either domestic or industrial, WAGO's range of spring pressure-based clamping connectors are likely to feature high up your wish list for any job. Installation is made much easier thanks to the tool-less operation of the components with reliable connections being made every time. However, WAGO doesn't just supply stand-alone connectors and terminals; pre-mounted solutions are also available, further simplifying the installation process.

Paul Witherington, UK and Ireland Marketing Manager for WAGO, explains: "The entire philosophy of the WAGO product range is simplification for end-users. If we can make an electrician's life a little bit easier on a job then they'll keep using our product. By supplying our products pre-mounted we further simplify their job as they just need to fix the enclosure to the wall or DIN rail and then push the conductor into place – job done.

"Of course we had to specify enclosures that offered the same performance levels as our components to make sure the connections would remain protected. We've worked with Spelsberg UK on many other projects in the past so we knew that it could offer the right quality. Additionally, the flexibility in the range meant we could find enclosures which provided the perfect dimensions."

Spelsberg's A-Box enclosure range has been specified to offer high quality, IP65 protection to WAGO's TOPJOB® S Terminals or 222 Series Connectors. A specialised carrier mounting has been developed to perfectly accommodate the WAGO components, maximising the space available inside the enclosure. Cable glands are also supplied, meaning end-users simply need to knock out the entry points as required and mount the enclosure.

The pre-mounted WAGO junction boxes are available from Screwfix and most other leading distributors. To find other solutions which combine the benefits of the WAGO and Spelsberg brand, please visit the WAGO website.

“Space for you”

Spelsberg's company philosophy is based around the idea of providing flexibility and freedom to its customers. The space provided within each junction box; the large distribution and warehousing space; and the freedom to customise almost any product, irrespective of quantity, all equates to “Space for you”.

About Spelsberg

Spelsberg is one of the largest manufacturers of electrical enclosures in the world. With over 4,000 enclosures available as standard and further customisation possible, it offers solutions for almost any application.

With the largest supply of non-metallic enclosures, ex-stock in the UK, its products are often available for delivery within 24 hours; customisation is possible on any product, including bespoke entries, engraved corporate logos or fitted terminals, within 48 hours. Products can be ordered direct from Spelsberg or from most leading supply specialists including RS, Rapid, Farnell and CPC.
