

Drives and Controls celebrate 18 years of Spelsberg distribution in Ireland

Drives and Controls, a leading supplier of automation products, is this year celebrating 18 years as an official distributor of Spelsberg enclosures. An appointed distributor to a wide range of recognised brands in the sector, the Spelsberg range offers customers reliable electrical protection, helping to improve the service life of associated equipment.

Spelsberg enclosures that are currently offered by Drives and Controls include the TK range featuring injection moulded polyurethane seals and tough construction; the WKE range of fire resistant enclosures, incorporating terminals manufactured from high temperature resistant ceramics; and the IP65 rated A-box range, which also offers increased fire resistance in application – as well as other designs. Coupled with Drives and Controls' other products such as PLC's, VSD's, I/O systems, HMIs, SCADA, terminals, power supplies and relays; those requiring a one-stop-shop for automation products are well catered for.

Aidan McDonnell, Managing Director at Drives and Controls, added: *"We want to offer our customers a consistent quality level, which means we will only offer proven products from leading brands. While enclosures are not the primary component of an automation system, the quality of enclosure is directly linked to the service life of the electricals it contains, and therefore the system as a whole.*

"Spelsberg offers a wide array of specialised and customisable enclosures that provide market leading protection, which matches the quality level we want to offer our customers. We aim to provide a comprehensive range of automation products, and Spelsberg enclosures have fit into that category for nearly 20 years now."

Chris Lloyd, Managing Director at Spelsberg, added: *"We are delighted that we have passed the 18 year mark with Drives and Controls, a business which has always offered great support to our activities. Drives and Controls allow us access to automation projects throughout Ireland and the rest of Britain, which provides us with increased market opportunities. With this milestone, we only hope that this is a business relationship that continues to grow and grow."*

About Spelsberg

Spelsberg is one of the largest manufacturers of electrical enclosures in the world. With over 4,000 enclosures available as standard and further customisation possible, it offers solutions for almost any application.

With the largest supply of non-metallic enclosures, ex-stock in the UK, its products are often available for delivery within 24 hours; customisation is possible on any product, including bespoke entries, engraved corporate logos or fitted terminals, within 48 hours. Products can be ordered direct from Spelsberg or from most leading supply specialists including RS, Rapid, Farnell and CPC.
